Single Touch Pty Ltd is an ATO Whitelisted STP Sending Service Provider

SINGLE TOUCH FOR TAX PRACTITIONERS

Single Touch Payroll. Quick, simple, affordable and perfect for managing your clients STP needs, big or small. We are an ATO Whitelisted **Sending Service Provider** with an absolute focus on providing Tax Practitioners with a viable STP solution, one that is designed for your practice. Together, we can enable your employer clients to become STP compliant, even those with one employee.

AFFORDABLE

Brian is a Tax Practitioner and handles the STP requirements for 15 employer clients comprising 98 employees. His clients have mixed pay frequencies and on average he sends 283 employee STP messages a month.

Our Single Touch service costs him \$28.30 a MONTH, less than \$2 a client! That's affordable.

HOW AFFORDABLE – EXACTLY?

Three of Brian's clients have one employee paid monthly. The cost of the Single Touch service for each of these is 10c.

10c makes our STP service very affordable, even for employers with one employee and no lock in contract.

HOW IS THIS POSSIBLE?

Using the Single Touch CSV builder, Brian designed a suite of CSV's that he felt would best serve his clients.

As Brian receives client's CSV's, he simply uploads them into the secure Single Touch portal. One client produces an XML file and he uses the same process for this.

HOW DOES BRIAN MANAGE THIS?

Easy. Brian has one account at Single Touch where he manages all of his clients and through which he delivers all the files he receives.

No chopping and changing accounts and one detailed invoice.

INVOICING

Brian receives a monthly invoice detailed by ABN making it easy to build STP fees into his practice fee structure.

OUR PERSPECTIVE

“The quality of our software and services is fundamental to our success and we understand the difficulties faced by Tax Practitioners and their employer clients.

We embraced Single Touch Payroll from its inception. Working with the ATO, Single Touch became the first company to successfully deliver a live STP payload, in July 2017. Today we have many clients running live.

The future growth opportunities in the Single Touch arena are truly exciting and we look forward to developing new products and services to complement your practice.”

RAY WAUGHMAN
EXECUTIVE DIRECTOR
SINGLE TOUCH PTY LTD

EASE OF USE & CONTROL

It's called Single Touch Payroll for a reason and we get very close to the mark. Providing you with control over what is being sent is important so we reveal key values before you "send".

STP COMPLIANCE

Using Single Touch to deliver your client's data to the ATO enables your client to become STP compliant no matter which payroll system they use or how their STP data is created.

VALIDATION

We apply the same validation rules used by the ATO before your clients STP data is delivered, so you know immediately if that data is acceptable.

You receive an audit report from Single Touch and an acceptance report from the ATO.

REPORTING

Single Touch provides a range of control reports so you can track activity and easily reconcile the STP values delivered to the ATO with those in your client's payroll.

YOUR BIGGEST BENEFIT

Your biggest benefit is that on 1st July 2018, your clients have a quick and cost effective STP solution that enables them to become STP compliant.
